-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 05 October 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3, 7, 9, and 14-21 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Farrell et al. (United States Patent No. 6,902,397).

Farrell et al. disclose a manual toothbrush comprising a handle 24 housing a power supply and a cleaning head 26 attached to the handle. The cleaning head has an outer surface and cleaning elements in the form of bristles 28 extending from the outer surface and located in a cleaning field. A source of radiation, such as an LED is provided for emitting light energy to the users teeth. The LED is mounted on the outer surface of the cleaning head (see figures 3, and 10). There may be multiple LEDs (see figure 10). The radiation source may produce light in the 350-420 nm range (col. 6, lines 38-40). Farrell et al. further discloses a method of whitening teeth comprising applying and oxidizing agent in the form of toothpaste to ones teeth and brushing them with a toothbrush while radiating energy form the toothbrush. Regarding claim 21, see the embodiment of Figure 11, which utilizes a motorized tooth brush.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3732

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Farrell et al.

Farrell et al. disclose the invention essentially as claimed except for the LEDs emitting light in the 350-420 nm range instead of in the 720-1550 nm range. It would have been obvious to one skilled in the art to use LEDs that emit light in the 720-1550 nm range instead of in the 350-420 nm range as selection of the wavelength of light is solely dependant upon the whitening agent utilized. Thus it would be within the level of one skilled in the art to select the proper wavelength of light to activate the whitening agent.

### *Response to Arguments*

Applicant's arguments with respect to claims 1-3, 6, 7, 9, 14-21 have been considered but are moot in view of the new ground(s) of rejection.

### *Conclusion*

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
